1096	Dave Thompson/ ENL	NTRAK	Junction	2 4 x 4 + 6 feet	2 feet	Power Poles	Two piece junction = four foot corner plus 6 foot junction Part of ENL layout	New River
1099	Thom Joyce	NTRAK	Yard	1 16'	18"	Power Poles	Setup yard; one module 16' overall, as four 4' sections. See pp 18-19 of NTRAK Newsletter http://www.ntrak.org/Newsletter/NL-J-A-14.pdf for article and photos. Yard will accommodate DC or DCC on any track and can operate with power from adjacent modules, bus lines, or as a standalone section. Each end has PowerPole AND Cinch Jones connections available. Functionality. West and East ends of the yard mirror each other; operation is the same at each end, so a train can enter the yard from any track (red, yellow, blue 1 or blue 2) and cross to any other track without changing direction. Red enters the yard and splits into a through track and set-up track. Yellow logging module with animated waterfall	Shenandoah
1106	Bill Pontin	NTRAK	Straight	2 2 x 4' = 8 ft total	2 foot	Power Poles		Blue Ridge
1108	Richard Brown	NTRAK	Straight	2 8 feet	26.5 inches	Power Poles	The modules have an electrically independent subway under the standard layout which accounts for extra 2.5 inches in depth.	Allegheny
1113	Leonard white	NTRAK	Straight	1	4	2 Power Poles		Blue Ridge
1116	Mark Bowman	NTRAK	Straight	1	4	2 Power Poles		Blue Ridge
1120	Richard D. Thornton	NTRAK	Straight	1 48 inches	30 inches	Power Poles	The is a depiction of an old time logging mill and log pond, complete with floating logs and a pushboat to Alternate blue or green line (not elevated) at each end **SPJ NOTE: CNJ Loop**	Shenandoah
1132	David Kolb	NTRAK	Yard	5 20'	2'	Power Poles	11 tracks total. Crossovers between red/yellow, yellow/blue, & blue/alt-blue	Piedmont
